i-PRO
The Power of Truth

We strive to capture moments of underlying truth to better support the decisions of those professionals who protect and save lives, providing a safer and more peaceful world.

We have taken on this challenge to develop technological solutions that extend human senses with innovations that inform and protect, even in the most challenging environments.

We envision a future where it's possible to prevent unfortunate events. A future striking unmet medical conditions to improve the lives of millions of people.

We will be a trusted partner, focusing on the needs of our partners and customers to help create a safer and more peaceful world.

Edge AI Technology

i-PRO Edge AI Cameras

With powerful Edge AI processor at the edge, i-PRO network cameras can process advanced analytics locally and only send the lightweight results as metadata to the backend server.

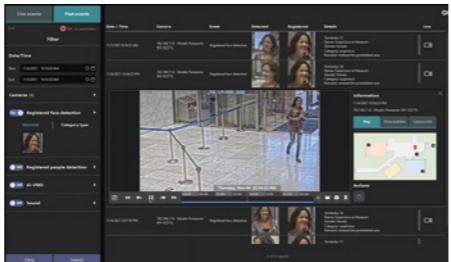

Computer vision chip architecture

Collaborating with AI SoC company Ambarella, i-PRO network cameras have on-boarding advanced analytics technologies inside.

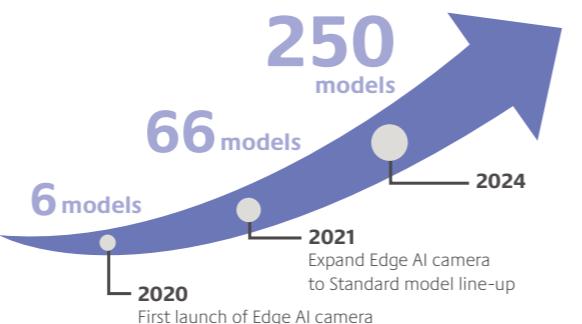

i-PRO Active Guard

i-PRO Active Guard is a time-saving search software which will help you to find out a specific objects quickly based on the metadata information from i-PRO Edge AI cameras.

Wide variety of Edge AI Cameras

i-PRO keeps expanding the product line-up of edge AI capable cameras since 2020 and it is growing to 250 models in 2024.

Open Platform

Integration with leading VMS

i-PRO network cameras are well integrated with leading VMS software, and i-PRO Active Guard integrated with in-house VMS Video Insight as well as Genetec Security Center and Milestone XProtect.

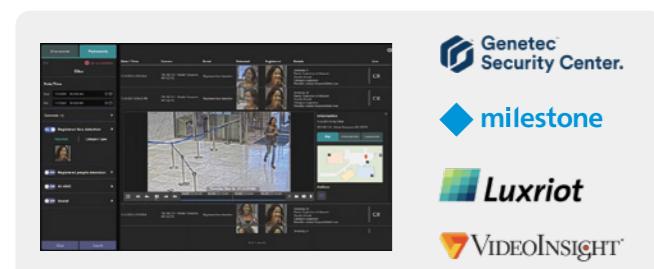

Integration with AI application partners

We will provide various AI applications developed in-house and developed by our global AI application partners.

Provides development support with free SDK/API

Free SDK/API and technical support is available for application partners.

Cyber Security

Built-in cyber security features

i-PRO cameras are designed and built with trust, safety, and security in mind. We take cyber security just as seriously as the lives and assets our products are made to protect. Our cameras include robust security features to meet the needs of customers who comply with security frameworks.

Pre-installed signed Certificates (GlobalSign®)

i-PRO was the first company in the security industry to provide a pre-installed signed certification by 3rd party certificate authority. Data is encrypted by SSL with pre-installed certified key and it will not allow any snooping and alteration.

FIPS 140-2 level 3 certified Secure Element

FIPS (Federal Information Processing Standards) are standards and guidelines for federal computer systems that are developed by NIST. Our latest models of i-PRO network cameras have equipped a Secure Element which is certified the FIPS 140-2 level 3 compliant.

NDAA compliant

i-PRO is proud to confirm that our products are compliant under the National Defense Authorization Act (NDAA). i-PRO doesn't use any manufactures, system on chips or any other components that have been banned under section 889 of the NDAA.

Product Reliability

IK10 Vandal resistant

Vandal resistant is one of the most important features of security cameras. IK10 rating indicates that the camera has a superior level of resistance against impact.

All i-PRO outdoor cameras comply the IK10 rating or more, which provides protection from physical damage.

ClearSight Coating

Our ClearSight coating enables to repel water drops on the dome cover in raining. This will provide you clear image in daytime and nighttime.

Anti-Condensation System

A built-in dehumidifier system avoids a condensation on the dome cover.

High durability mechanism for PTZ cameras

Pan/Tilt gear drive mechanism allows our i-PRO PTZ cameras to have longer life and more precision than a general belt-drive mechanism.

Built-in heater (Selected models)

Help to defrost snow or icicles on the camera even in extremely cold regions.

*Available only with special model

Reduced Bandwidth

AI Smart Coding

i-PRO Edge AI Cameras will detect people and vehicles and optimize the encoding parameters to reduce the bandwidth.

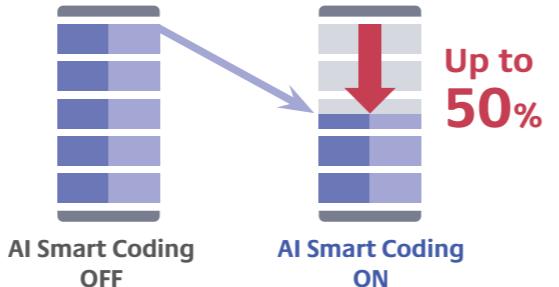

Bitrates of tree area are suppressed even it's swaying.

Bitrates of face and human area are maintained higher for high image quality.

Reduced Bandwidth

i-PRO Cameras' AI Smart coding supports up to 50% reduced bandwidth improvement.

i-PRO NETWORK PRODUCTS

i-PRO cameras are designed for multiple applications and provide a wide range of capabilities, including Enhanced Super Dynamic, High-accuracy Motion Detection, Analytic features, Face Detection, Wide-area Monitoring, and more.

Multi Sensor Cameras

i-PRO multi-sensor cameras capture the highest quality images even in very challenging dynamic environments. These cameras can excel at capturing clear images, even in low light conditions from multiple angles through the use of their four repositionable lenses.

Bullet/Box Cameras

i-PRO fixed box bullet/box cameras provide a clearly visible, fixed angle of view, making it easy to see exactly where they're pointing and record a precisely defined area.

PTZ Cameras

i-PRO PTZ cameras combine unparalleled image quality with incredible durability and reliability. The perfect security camera for wide-area coverage requiring pan, tilt and zoom capability.

360 Degree Cameras

i-PRO vandal resistant 360° dome cameras are ideal for surveillance applications where wide area coverage is required. This type of camera allows for multiple viewing angles and can be used to improve area management as well as detect activities in a large area.

Dome Cameras

i-PRO fixed dome cameras have the power to be more discreet than standard fixed network cameras. i-PRO fixed dome cameras work well in busy open areas since they can conceal which direction they are pointing while still providing excellent and reliable video.

Compact dome

Compact dome cameras with anti-vibration and discreet design are suitable for installation in cars, buses, and other vehicles.

i-PRO mini

i-PRO mini provides powerful open AI technology in a compact format. It blends seamlessly into any surroundings and provides insights to solve a variety of problems. Extendable to marketing functions with third party AI apps.

Ease of Installation

Cameras designed for easier installation

i-PRO multi-sensor cameras are industry thinnest design and blends in seamlessly with environment. The hooking structure and light weight bring you an ease of installation.

Supports USB Wifi adapter (Selected models)

With Wifi USB dongle i-PRO cameras can be accessed via smartphone without connecting the camera to PC or analog monitor. The angle of view and the focus can be adjusted easily.

*Wifi USB dongle needs to be locally procured.

Installation Tools

i-PRO provides useful installation tools to support system design and configuration works easier and more efficient.

- Product Selector
- SDT (System Design Tool)
- ICT (i-PRO Configuration Tool)

Easy kitting package

i-PRO easy kitting package is helpful for pre-configuration works. Cameras can be configured quickly without opening the box.

i-PRO Management Software

WV-ASM300W

Extension Software

WV-ASE202W / WV-ASE203W / WV-ASE205W

Easy setting: New WV-ASM300W software enable a whole setting from camera configuration to recorder configuration.

- Up to 100 recorders, 64 encoders and 256 directly connected cameras can be registered. Up to 6,400 cameras registered in the recorders and 256 cameras registered in the encoders are automatically registered in the WV-ASM300W (the number of the cameras depends on the recorder and encoder).
- Encryption of SSL and data encryption support latest "AES-256bit key" strong encryption.
- MP4 data direct download from WJ-NX310,NX410,NX510,NU101,NU201,NU300,NU301.
- When used with WJ-NX310,NX410,NX510,NU101,NU201,NU300,NU301,VMD, thumbnail search can be operated.
- Selecting the camera icon in map window, a still image of the camera is overlaid.
- Live window, Map window in addition to the Operation window (3 monitors).
- Control using the System Controller WV-CU980
<https://i-pro.com/global/en/surveillance/products/wv-cu980>
- 3D Dewarp: virtual PTZ operations for better operability and monitoring experience.

*To use the multi-monitor function, it is necessary to install an additional video card on the PC in use.

*monitor displays are optional.

WV-ASE202W

- Expand the maximum numbers of screens to 64.
- Up to 4 live windows.

- Multi-monitor function using up to 6 PC monitors.

- To display the operation window, the map window and the 4 map windows simultaneously.

WV-ASE203W

- Expand the maximum numbers of registered recorders, encoders and cameras to 100, 64 and 256 respectively.
- Up to 4 licenses for the WV-ASE203W can be added.

WV-ASE205W

- Visibility Enhancement Function.

i-PRO Active Guard / AI Edge Applications

Immediate response to or prevention of incidents

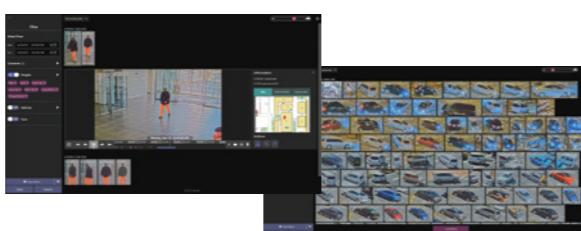

- Detect various events such as intruder, gunshot sound, and watchlist alarm for specific faces, people, vehicle and license plate group.
- Rule-based action on VMS enables automation of system behavior when an event occurs.
- A mobile application* frees you from work in a monitoring room. Also, by linking the PC software and mobile application, the necessary information can be transmitted from a person in the monitoring room to the security guards outside.

*Video Insight only.

Significant reduction in post investigation time

- Searching by face, license plate, and characteristics of people and vehicles enables fast searching in a matter of seconds, not hours.
- This advantage is maximized by many supported attributes with high precision based on i-PRO deep learning technology and by the high image quality of the i-PRO camera.

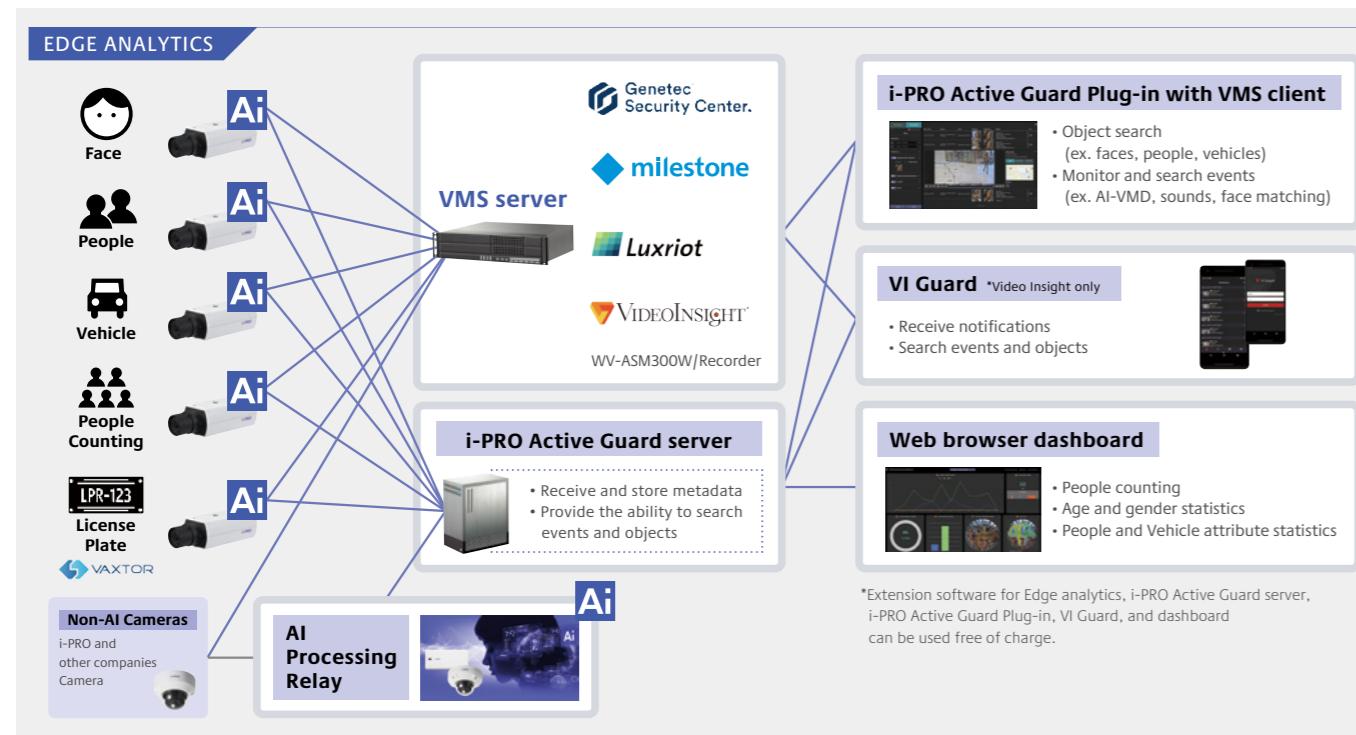

Customizable dashboard display for business intelligence

- The dashboard on the web browser shows people counting, license plate counting, face and gender statistics, and people and vehicle attribute statistics. This can be utilized for business intelligence.
- Users can customize the content, size, location, data display period, etc. shown according to their needs.

Flexible system architecture

- Fully integrated into devices from Genetec and Milestone as well as Video Insight.
- No need for expensive analysis server thanks to edge analytics.
- By installing and using the required AI Edge Applications for each camera, you can use the performance of AI without waste.

Edge AI Analytics

GO BEYOND TRADITIONAL ANALYTICS WITH INTELLIGENT SOLUTIONS FROM i-PRO

In today's environment, more users are looking to actively manage large surveillance systems. As these systems become more complex, i-PRO's intelligent analytics can help users by reducing the learning curve and system resources required to operate them. From improving the accuracy of alarms and notifications to reducing the overall system bandwidth and storage requirements, i-PRO Intelligent analytics has you covered.

- Change your surveillance system from reactive to proactive and anticipate situations before they occur.
- i-PRO surveillance users can gain added sight awareness with intelligent analytics via scene analysis.
- Optimized feature solutions for schools, municipalities, and commercial facilities.
- i-PRO analytics may be deployed either at the edge or server level providing a flexible deployment.

ANALYTICS AT THE EDGE

AI-VMD/AI Counting

AI-VMD can identify between objects. The cameras actively read the scene and uniquely differentiate between cars, motorcycles, bicycles and people. Additionally, AI-VMD offers users intelligent functionality such as line-cross detection/counting, scene-change detection, loitering detection and directional detection.

AI People/Vehicle/Face Detection

These analytics allow you to detect people, vehicles, faces, and send the metadata and best images to the server. They are compatible with i-PRO Active Guard, a search function that quickly finds people or vehicles through the video management software, Video Insight and Genetec.

AI Scene Change Detection

Scene Change Detection is the first AI-based analytic application that provides easy on-site learning of a scene. When anomalies occur within the camera's field of view, an alert can be sent to security and operations teams. It's particularly good at an object left behind or illegal parking scenarios.

AI Sound Classification

AI Sound Classification allows you to detect suspicious sounds, such as gunshots, screaming, vehicle horns or glass breaking.

*External microphone is required

AI Privacy Guard

When deployed on i-PRO AI engine cameras, AI Privacy Guard protects the privacy of individuals within the scene by applying a mosaic over their face in real time.

AI Occupancy Detection

When deployed on an i-PRO AI engine camera, AI Occupancy Detection will be able to detect the crowd congestion and send the pop-up alarm notification.

Information of the number of people in the area can be output externally via HTTP or MQTT.

AI On-site Learning

AI On-site Learning allows to enhance AI analysis by adding target object and improving accuracy. You can add customized objects to detect using on-site camera footage through simple learning process. In addition, it contributes to reduce missed/false alarms by training based on the past footage.

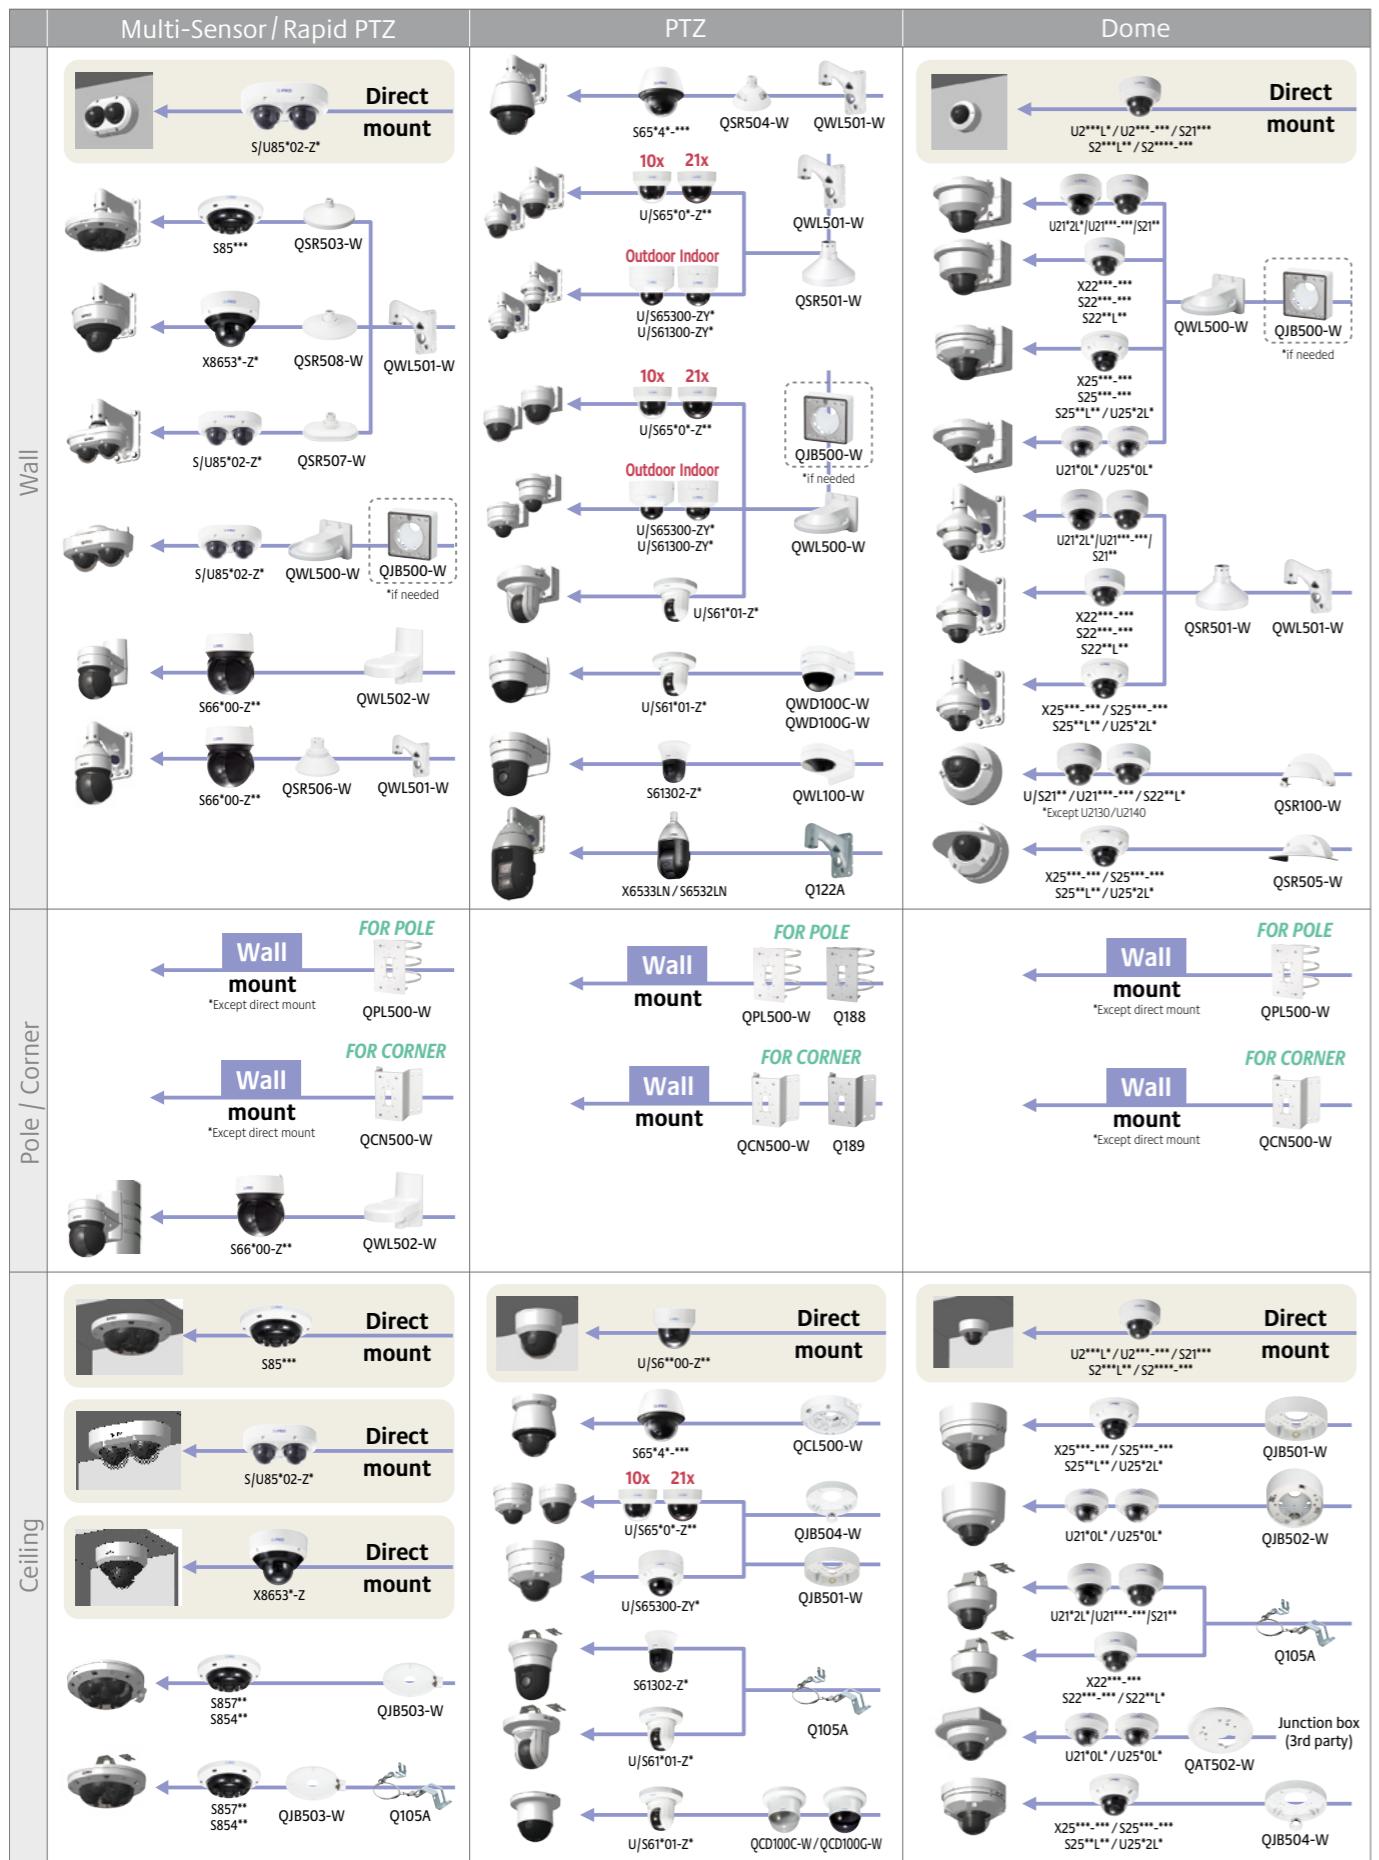

AI Processing Relay

AI processing relay enables to turn "non-AI camera" into "AI camera" without any re-installation costs. It receives MJPEG data from non-AI cameras, performs AI processing with AI extension software, and performs alarm reception and image search with i-PRO Active Guard.
